

REPRESENTATIVE PRODUCT-RELATED CONSULTING MATTERS

- Drafted product recall procedures for a global hand held devices manufacturer.
- Drafted product labels and warnings as well as supplier agreements for a manufacturer of floor waxes and polishes.
- Provided product liability advice for a start-up electric vehicle manufacturer, including editing and drafting internal procedures for early assessment of potential product liability issues.
- Assessed and advised on the product liability and safety concerns associated with the development and sale of a communications system for use in underground mines.
- Assessed and advised on the product liability and safety concerns associated with the design and manufacture of infant bath tubs for a children's products manufacturer.
- Drafted a product recall plan for an international industrial identification solutions company.
- Assessed product warnings, labels and instructions for use for a global luxury goods manufacturer with respect to the sale of sunglasses and shoe polish kits.
- Assessed product warnings, labels and instructions for use for an industrial manufacturer with respect to the sale of wood glue.
- Reviewed contractual provisions of an auto retail Vehicle Supply Agreement with a global automaker.
- Reviewed contractual provisions of a national children's activity and learning center company's supply agreements with Chinese manufacturers.
- Provided advice on the potential product liability ramifications of advertising materials for an auto glass manufacturer.
- Reviewed product warnings and instructions for use for a leading medical device manufacturer's latest product.
- Provided ongoing advice on compliance with TREAD Act reporting requirements for a global manufacturer of gas springs and dampeners.
- Reviewed and drafted warnings for a car-navigation device.
- Reviewed and drafted product warnings and instructions for use for an electric machine manufacturer's fans.

Additionally, at my prior firm, Baker & McKenzie, I served as the lead editor for and also wrote part of a "Global Product Recall Handbook" that addressed best practices for preparing for and implementing a global product recall and included rules and regulations from approximately 29 jurisdictions.
